## EDUCATION

---

**Iowa State University** GPA: 3.73  
*Doctor of Philosophy, Computer Engineering* Aug 2018 - Dec 2022  
**Thesis:** Manifesting Reliability Issues in Storage Systems

**New Mexico State University** GPA: 3.67  
*PhD Student, Computer Science* May 2017 - July 2018

**New Mexico State University** GPA: 3.67  
*Master of Science, Computer Science* Jan 2014 - May 2017  
**Project:** Understanding the Fault Tolerance of File System Checkers

**Jawaharlal Nehru Technological University** Percentage: 68.29%  
*Bachelor of Technology, Electrical and Electronics Engineering* Aug 2006 - Jun 2010  
**Project:** Modeling and Performance Analysis of 6/4 Switched Reluctance Motor using MATLAB / SIMULINK

## WORK EXPERIENCE

---

**Senior Systems Software Engineer** Jan 2023 - Present  
*SK Hynix America* San Jose, CA  
Currently working as a researcher in SOLAB team at developing methods to enable "Data-centric Computing" using techniques such as Computational Storage and Computational Memory.

**Graduate Research Assistant** Aug 2018 - Dec 2022  
*Data Storage Lab, Iowa State University* Ames, IA  
My research emphasizes on manifesting vulnerabilities in the storage stack. The key contributions of my thesis are:

- **Dataset of Persistent Memory Bugs in the Linux Kernel:** In this project we have performed a survey on existing Persistent Memory related vulnerabilities in the Linux kernel, and identified the dominant and unique bug patterns. This dataset would help guide future research at building efficient bug detection tools
- **Analysis of Failure Recovery Procedures in Parallel File Systems:** In this project we study recovery procedures in Parallel File Systems (such as Lustre) to identify their failure patterns. We built a black-box fault injection framework called PFault to systematically inject failures in PFS and study the consequences. We have also performed another study to identify the performance bottlenecks in Lustre checker that may cause long recovery time.
- **Fault Resilient File System Checker (RFSCCK):** In this project we uncover the impact of interrupted repair procedure on file systems, and device a generalized redo logging library called "RFSCCK-LIB" to mitigate these issues.

In addition, my responsibilities include mentoring graduate and undergraduate students, and collaborating with my peers to support their research.

**Graduate Teaching Assistant** Aug 2021 - May 2022  
*Iowa State University* Ames, IA  
Worked as teaching assistant for Operating Systems course. Designed course homework and lab projects. Other responsibilities include teaching and mentoring undergraduate students.

**Research Intern** May 2019 - Aug 2019  
*Western Digital* Milpitas, CA  
Assisted researchers at developing a kernel module called "HMMAP". This module enables users to create memory map-able character device with a pluggable cache that provides additional memory to applications. Developed a methodology to identify frequently accessed memory pages and promote them to the cache for faster access.

**Graduate Teaching Assistant** Jan 2015 - Jul 2018  
*New Mexico State University* Las Cruces, NM  
Worked as teaching assistant for courses such as Computer Architecture, Compiler and Java programming. Other responsibilities include designing course assignments and mentoring students in respective courses.

**Systems Engineer** Feb 2011 - Dec 2013  
*Tata Consultancy Services, Ltd.* Chennai, India  
Worked as software developer building retail software in Java and writing backend RESTful webservices. Other responsibilities include building XML Schema for new REST webservices, writing scripts for deploying new build in Jenkins and coordinating with testing team to generate workflow test cases.

## SKILLS SUMMARY

---

<b>Languages:</b>	C, C++, Java, Python, SQL, Bash
<b>Tools:</b>	Intel Pin, perf, GIT, QEMU, LLVM, RocksDB, Memcached, Redis
<b>Platforms:</b>	Linux, Windows, Chameleon and CloudLab
<b>File Systems:</b>	Knowledge in EXT 2/3/4, XFS, Btrfs, Lustre
<b>Others:</b>	Knowledge in NVDIMM subsystems, PMDK and filesystem utilities

## HONORS AND AWARDS

---

- Received USENIX Student Grant to attend FAST'17, FAST '19 and FAST '20 Conference
- Received "Best Paper Honorable Mention" at FAST '18 Conference

## OTHER PROFESSIONAL ACTIVITIES

---

- Served as a reviewer for the 15th BenchCouncil International Symposium on Benchmarking, Measuring and Optimization, 2023.
- Served as sub-reviewer for three papers for the 36th IEEE International Parallel & Distributed Processing Symposium (IPDPS), 2022
- Served as sub-reviewer for the IEEE Transactions on Reliability, 2020
- Volunteered in Iowa STEMS Festival (Spring 2019) for K-12 students
